## Summary

Experienced Software Engineer specializing in web and mobile software solutions. With seven years of experience in software engineering, I have a thorough understanding of the latest trends in the field.

Throughout my career, I have been involved in all phases of product development, from planning to testing. My expertise spans modern web and mobile development technologies, including React Native, React, NodeJS, and Next.js. I consistently face new challenges and stay updated with the latest advancements to ensure my work is innovative and effective.

## Experience

### Senior Software Engineer

#### Taskrabbit

Nov 2019 - Present (4 years 10 months)

TaskRabbit is an American online and mobile marketplace that matches freelance labor with local demand, allowing consumers to find immediate help with everyday tasks, including cleaning, moving, delivery, and handyman work.

#### Responsibilities:

- Release Management: Acted as the release manager numerous times, managing the rollout of new app versions and ensuring smooth, successful launches
- App Upgrades: Led multiple upgrades of the React Native mobile app to improve functionality and user experience
- Maintenance: Responsible for maintaining the mobile app and its packages, ensuring up-to-date and efficient operations
- Demos: Regularly demonstrated new features and updates in front of other employees during demo sessions
- Testing: Developed and wrote both unit tests and Detox end-to-end tests to enhance the stability and reliability of the mobile app
- CI/CD Processes: Involved in setting up and optimizing the Continuous Integration and Continuous Deployment (CI/CD) processes for the mobile app, contributing to streamlining development and deployment workflows
- Agile Project Management: Participated in bi-weekly Scrum sprints, helping to drive project progress and resolve issues promptly
- Feature Development: Responsible for developing new features including Calendar Integration, Performance Metrics, Promotional Discounts, Stripe Integration, Client Rescheduling, and Expansion of Tasking Zones, among others
- Admin Web Application Development: Worked on enhancing the admin web application, improving tools for platform management and administration
- Currently part of the Tasker Lifecycle team, focusing on developing and enhancing the React Native mobile app, as well as contributing to the admin web application

## **Honors & Awards**

### **Upstack Charity Hackathon '20 - Upstack**

This hackathon was based on the idea of donating the earnings the winners are gonna get. Easy to say... Harder to do!

But the amazing team that we've worked with understood the need that came from the worldwide #covid situation and decided to donate everything, helping those in need!
