Experience

Career

Senior Software Enginner

Taskrabbitt • Contract
Nov 2019 - Dec 2025
San Francisco Bay Area

Taskrabbitt is an American online and mobile marketplace that matches freelance labor with local demand, allowing consumers to find immediate help with everyday tasks, including cleaning, moving, delivery, and handyman work.

- Responsibilities:**
- Release Management: Acted as the release manager numerous times, managing the rollout of new app versions and ensuring smooth, successful launches
 - App Upgrades: Led multiple upgrades of the React Native mobile app to improve functionality and user experience
 - Maintenance: Responsible for maintaining the mobile app and its packages, ensuring up-to-date and efficient operations
 - Demos: Regularly demonstrated new features and updates in front of other employees during demo sessions
 - Testing: Developed and wrote both unit tests and Detox end-to-end tests to enhance the stability and reliability of the mobile app
 - CI/CD Processes: Involved in setting up and optimizing the Continuous Integration and Continuous Deployment (CI/CD) processes for the mobile app, contributing to streamlining development and deployment workflows
 - Agile Project Management: Participated in bi-weekly Scrum sprints, helping to drive project progress and resolve issues promptly
 - Feature Development: Responsible for developing new features including Calendar Integration, Performance Metrics, Promotional Discounts, Stripe Integration, Client Rescheduling, and Expansion of Tasking Zones, among others
 - Admin Web Application Development: Worked on enhancing the admin web application, improving tools for platform management and administration
 - Contributed to the Tasker Lifecycle team, driving enhancements in the React Native mobile app and implementing improvements to the admin web application to optimize platform management

Skills: React Native, React.js, TypeScript, Ruby on Rails, Docker, MySQL, Mobile Application Development

React Native Developer

Aurity • Contract
Jun 2019 - Nov 2019
London, United Kingdom

Aurity is a Tech Accelerator that empowers everyone with digital products driving positive change by connecting excellent developers with great companies, and by mentoring, using the latest technology, best practices, and automated infrastructure.

- Responsibilities:**
- Web and Mobile App Development using React, NextJS, and React Native
 - Employed cutting-edge tools and technologies for the delivery and optimization of solutions for clients
 - Followed best practices and coordinated with UX designers to meet accessibility standards at the code level on projects
 - Code, test, debug, implement, and document complex applications on various Aurity projects
 - Set up **Monorepo** and the ability to share components between web and mobile apps
 - Worked on an internal project, which was a learning platform for developers built by Aurity
 - Worked with several clients of Aurity on various gigs

Skills: React Native, React.js, Next.js, GraphQL, Node.js, Express.js, MySQL

Full-Stack Software Engineer

NowMatters • Contract
Nov 2018 - May 2019
Stockholm, Sweden

NowMatters is building data-driven brands promoting business, success, and well-being. The company is headquartered in Stockholm.

- Responsibilities:**
- Designed, developed, tested, deployed, maintained, and improved software solutions for the SmartSenior app
 - Contributed to product and solution designs, addressed critical implementation issues and resolved complex problems on the project
 - Participated in code reviews and performed performance-related diagnostic troubleshooting/analysis on solutions
 - **Team Lead and Co-Founder**

Skills: React Native, React.js, Next.js, Node.js, Express.js, GraphQL, PostgreSQL, MySQL

Full-Stack Software Engineer

Local Software Comapny • Full time
Oct 2017 - Nov 2018
Banja Luka, Bosnia and Herzegovina

- Responsibilities:**
- Developed and delivered high-quality code for solutions on time; leading a cross-functional team of developers on projects for clients
 - Team Lead for **IWaaant**, a mobile social network
 - Worked with and maintained existing codebase as well as new components; maintaining production code and contributing to deployment and QA processes on projects
 - Offered production expertise for defect triaging, impact analysis, resolution planning, and implementation

Skills: React Native, React.js, Next.js, Node.js, Express.js, GraphQL, RestAPI, MySQL

Stefan is one of the most skilled React Native and full-stack engineers I've worked with. At 3Five, his ability to balance architecture decisions with hands-on execution was invaluable to building a reliable, high-performing platform.

Shawn Michael
CTO, 3Five

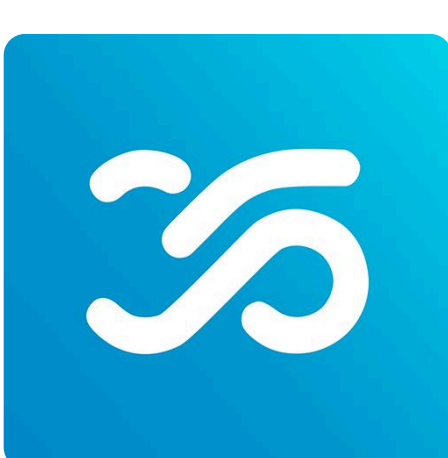

Featured projects

Taskrabbitt

Led multiple React Native app upgrades improving performance and reducing crash rates. Oversaw release management, CI/CD optimization, and Stripe payment integration. Delivered key features including Calendar Integration, Performance Metrics Dashboard, and Promotional Discounts.

Industry:	Consumer Marketplace / Enterprise Tech
Role:	Senior Software Engineer
Technologies:	React Native, React.js, TypeScript, Ruby on Rails, Docker, MySQL

3Five

Led the development of a next-generation social platform designed to promote positive interaction and meaningful engagement. Oversaw architecture decisions, code quality standards, and feature prioritization. Optimized performance and scalability, resulting in a seamless, high-retention user experience.

Industry:	Social / Community
Role:	Tech Lead
Technologies:	React Native, React, Node.js

Atmosfy

Built a global local-discovery app used in 100+ countries to help users find and support local businesses. Delivered end-to-end features for search, discovery, and user onboarding while ensuring scalability and smooth cross-platform performance.

Industry:	Consumer / Local Discovery
Role:	Full-Stack Developer
Technologies:	React Native, Redux, TypeScript

Smart Senior

Contributed to the mobile app development for Smart Senior, a membership platform dedicated to empowering those over 55 with exclusive discounts and offers. Smart Senior addresses the often-overlooked needs of experienced consumers, delivering tailored benefits for the 55-plus community.

Industry:	Consumer / Membership & Discounts
Role:	Mobile Team Lead
Technologies:	React Native, Redux, TypeScript, Node.js

Honors & Awards

- Upstack Charity Hackathon Winner (2020)
- Led a winning team project, donating all prize earnings to COVID-19 relief efforts
- Contributions went to Mosaic of Friendship, a local citizens association in Banja Luka that runs the "Meal of Love" soup kitchen, providing daily meals for people in need
- Recognized by Upstack for community impact and social responsibility
